ORSY® IS ORDER BUT WITH A SYSTEM!

How can small parts and fastening materials be organised in such a way that you can find everything immediately and ensure replenishment in good time? Based on this question, an idea was born at Würth in 1977, which has inspired our work to this day: ORSY® - Order with a System.

In the beginning there was a rack and tailored assortments of small parts. Today, ORSY® is a universal logistics principle that intelligently interlinks procurement, storage and transport.
